

Digital Optical Micrometer Kit

Part No. 8400K

The 8400K from J Chadwick Co performs quick and accurate measurements of surface damage to mechanical parts. Inspect scratches, blemishes and corrosion pits easily with repeatable results, where other methods are time consuming and inconclusive.

The 8400K can be used to inspect damage on drive shafts, masts, couplings, turbine blades, propellers, leading edges, fuselage skin, windshields, canopies and many other applications.

- Save time - make fast, accurate and repeatable measurements.
- Save money - stop scrapping parts that are still in tolerance.
- Eliminate guesswork - replace the "fingernail test" with a precise instrument.
- Backup visual inspections with exact measurement data.
- Improve traceability and quality control.
- Improve documentation and monitor trends over time.

Each 8400K Kit Contains:

- Micrometer with digital display
- 2 eyepieces
- Flashlight with spare batteries
- Scratch sample plate for training
- 3 interchangeable bases
- 2 objective lenses
- Allen wrench
- Sealed, foam lined case

Documentation Included:

- Manufacturer's Certificate of Conformance
- Certificate of Accuracy
Calibration certificate traceable to NIST is available for additional \$175.00.
- Manual and Warranty
