

**Telephone Dialer Functions with Two-Way
Text Messaging Capabilities**

MMU-II™ Mission Management Unit

The MMU-II™ integrated dialer and text messaging terminal is the smallest cockpit dialer available, with highly customizable options for prestored messages, forms and phone numbers.

The MMU-II provides access to the best features of the Iridium® satellite network on any flight deck of any type of aircraft, from airliners to helicopters.

The MMU-II is designed to minimize cockpit workload with its large storage capacity for preprogrammed telephone numbers, custom text messages and mini forms – all of which are accessed through a single control knob.

Product Highlights:

- 500 prestored phone numbers with names
- 200 prestored text messages and mini forms
- Two-line, 32-character display
- Full DTMF telephone keypad
- Keypad text entry
- Remote configuration
- Optional NVG/NVIS compatibility
